

Goutham Kishore Krishnamoorthy

Arlington, TX | +1-682-376-8423 | gouthamkishore.k@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Data Engineer with 3+ years of experience designing and optimizing ETL workflows using Apache NiFi, Python, and SQL. Delivered production-grade data pipelines that reduced manual processing by 40% and improved BI reporting accuracy by 25%. Experienced in collaborating with cross-functional teams, mentoring junior analysts, and leveraging cloud technologies to support data-driven decisions.

Education

University of Texas at Arlington

Jan 2024 - Dec 2025

Master of Science, Data Science

- **GPA:** 3.8/4.0
- **Coursework:** Machine Learning, Data Engineering, Big Data Management, Analytics & Visualization

Vel Tech High Tech Dr. RR Dr. SR University

Jun 2017 - Jul 2021

B.Tech, Computer Science Engineering

- **GPA:** 3.08/4.0

Technical Skills

- **Programming & Query:** Python, SQL, Scala, Java
- **BI & Visualization:** Tableau, Power BI, Apache Superset, Plotly, MicroStrategy, ArcGIS
- **Data Engineering:** Apache NiFi, ETL Pipelines, Data Warehousing, Apache Kafka, PostgreSQL, Oracle, MongoDB, Informatica ETL Tool, Abinitio/Informatica BDM, Hadoop (HDFS), Very Large Database
- **ML & Analytics:** scikit-learn, XGBoost, NLP (TF-IDF, Transformers), Statistical Analysis
- **Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD, Helm
- **Frameworks & Tools:** React, Node.js, TypeScript, Express, Spring Boot, LangChain, Auth0, Git, JIRA, Agile Delivery

Professional Experience

CGI

Aug 2021 - Jan 2024

Data Engineer

Bangalore, India

- Built and automated 15+ production-grade data pipelines using Apache NiFi and Informatica BDM, reducing manual processing effort by 40% and enabling near real-time integration across SQL, file-based, and Kafka sources
- Migrated and transformed data across Oracle and PostgreSQL databases using Python, ETL tools, and Hadoop (HDFS), supporting enterprise data warehousing and analytics requirements
- Refactored transformation logic and streamlined BI reporting workflows, increasing dashboard accuracy by 25% and reducing report generation time from hours to minutes
- Designed interactive dashboards in Apache Superset and Power BI for financial insights, delivering actionable analytics to business stakeholders
- Collaborated with business development teams in an agile delivery environment on technical proposals, client demos, and pre-sales activities while ensuring ethical data handling and compliance with governance standards

Compass Group USA

Aug 2024 - Dec 2025

Business Intelligence Engineer

Arlington, TX

- Formulated ambiguous business problems into measurable analytical objectives by integrating **Oracle POS** and **OrderMaestro** data in a very large database environment, creating high-quality datasets spanning sales, inventory, labor, and financial performance
- Performed deep **EDA and feature engineering** using **Python (Pandas, NumPy)** to surface demand seasonality, operational bottlenecks, and cost drivers influencing market-level outcomes.
- Built and evaluated predictive and time-series models (regression, baseline forecasting, error analysis) to support demand planning and inventory optimization, driving a 15% reduction in stockouts and excess inventory.
- Trained and mentored junior analysts in an agile delivery framework, fostering a culture of continuous improvement and professional growth. Presented actionable insights to senior management, supporting strategic decision-making

Key Projects

AIO AI Operator Platform

- Architected production-grade AI platform delivering real-time insights, automated summaries, and performance metrics through event-driven architecture with TypeScript/Express backend (8+ REST endpoints)
- Developed React dashboard with interactive visualizations and secure Auth0 OAuth2/JWT authentication; deployed on Render/Vercel with production-ready error handling

ServiceNow Ticket Analytics & Predictive Assignment Modeling

- Led analysis of 3 years of ServiceNow data using Python and NLP (TF-IDF, transformers) to predict optimal assignment groups and reduce ticket reassignment rates
- Developed interactive dashboards (Plotly, Power BI) revealing workflow inefficiencies and informing process optimization initiatives

Retail Sales Forecasting

- Built predictive models achieving 92% accuracy for monthly retail sales forecasting; designed Power BI dashboards for demand planning insights

Certifications

- **BI Tools Training:** Tableau, Power BI, ArcGIS, MicroStrategy (Udemy, Coursera)
- **Scala Certification:** (Coursera)
